10-In. Magnetic Torpedo Level

Heavy duty, die cast frame with V-groove and high strength magnets. Big, bright easy to read vials. 3 Vials: Level/plumb/45-degree.

6912

Tech Level This rugged and practical high-quality level is the choice for any trade that needs to set angles precisely and quickly. If your work is going to be checked, invest in German Engineering. The Checkers are using STABILA. The electronic measuring technology and precision vials makes work faster and more efficient. The two illuminated digital displays can be read from both the side and the top. It is IP 65 certified therefore fully washable and dustproof. When STABILA designed this electronic level, they added everything you need and then some, making this a tool you can't do without.

Save BIG

The STABILA Mason's level is designed for those who set brick, block and stone with a trowel. Patented striking shields allow the top of the level to be struck with the butt or blade of a trowel without causing damage to either the level or the trowel. 24" or 48"

6913-6914

RBEAM Level Especially suitable for craftsmen who have to subject their tools to extremely demanding conditions. For example, in bricklaying and carpentry, in wood construction, reinforced concrete construction, window fitting, road construction and professional landscape construction.

6917

The STABILA Mason's level is designed for those who set brick, block and stone with a trowel. Patented striking shields allow the top of the level to be struck with the butt or blade of a trowel without causing damage to either the level or the trowel. The kit includes 10" magnet, 24", & 48" Levels
